AUTONOMOUS VEHICLE LEADER AND SPECIALIST NAVYA PRESENTS AUTONOM CAB AND AUTONOM SHUTTLE AT THE GENEVA MOTOR SHOW FROM 6 TO 18 MARCH

Since 1905, the Geneva Motor Show has been showcasing the very latest in automobile technology. This year's edition provides the perfect opportunity for NAVYA to present its AUTONOM range of fully autonomous and electric vehicles for a more fluid and shared mobility experience.

AUTONOMS: fluidifying urban centres as of now.

Comprising public transport vehicle **AUTONOM SHUTTLE** and **AUTONOM CAB**, the first on-demand robotaxi on the market, the AUTONOM range has been developed to revolutionise urban mobility, habits and technology. The vehicles in the AUTONOM range were designed from the outset to be fully autonomous, meaning that there is no cockpit, steering wheel nor pedals. Electric, shared and on-demand, they can communicate with one

another and with their environment.

A multitude of services for AUTONOM CAB and an AUTONOM SHUTTLE service available for visitors

Launched on 7 November in Paris, AUTONOM CAB offers a wealth of services. Users can order the vehicle using the dedicated smartphone application, geolocate it and close the doors when ready to set off. Once on board, passengers can pre-order and buy cinema tickets, obtain tourist information or even order a coffee which they can pick up at their destination. With AUTONOM, NAVYA enables citizens to manage their time and space.

"Our AUTONOM SHUTTLES are already operating in more than 14 countries worldwide, providing mobility solutions for the first and last mile. With AUTONOM CAB, NAVYA is revolutionizing urban mobility" explains NAVYA Marketing Director Nicolas de Crémiers.

Visitors to the show can travel around in a more fluid manner by hopping on board an **AUTONOM SHUTTLE**, operated by Transports Publics Genevois (TPG), which will be running between the car park and Palexpo throughout the show. NAVYA's autonomous mobility solutions can be found on the **E-mobile booth, #5141**.

260 000 engineering hours

2 production sites (FR/US).

Company headquarters in France

50 positions open for recruitment

ABOUT NAVYA

NAVYA, created in 2014, is a French company and leading name in the autonomous vehicle market. October 2016 saw NAVYA secure a 30 million euro raise in capital together with its original shareholder, investment fund Robolution Capital, Cap Decisif Management with the FRCI Fund (Fonds Régional de Co-investissement de la Région Ile de France), holding company GRAVITATION, French groups VALEO and KEOLIS. NAVYA benefits from major advances in technology in the driverless, electric vehicle sector thanks to a highly-qualified R&D team. Christophe Sapet, its CEO, is supported by a team of 210 people divided up between Paris and Lyon (France) and Saline (Michigan, USA). For more information visit <http://navya.tech/>
